

Shady Mohamed Ameen Sobh

Software Testing Engineer

✉ shadyamieen@gmail.com ☎ +201024383162 📍 Cairo, Egypt 🌐 shady-mohamed 🎮 shady-55

Summary

ISTQB Foundation Level V4.0 Certified Quality Assurance Engineer with hands-on experience in manual, API, automation, and performance testing for web applications. Skilled in test case design, defect identification, reporting, and quality validation using Jira. Experienced in Selenium WebDriver, Cypress, Java, TestNG, JMeter, API testing with Postman and Swagger, and version control with Git

Experience

- Software Testing Engineer, Azzrk (Full Time-On-site)** 07/2026 – Present
- Executed manual testing across web application features and end-to-end user workflows, validated API responses using Postman, and automated key regression scenarios with Selenium while tracking defects in Jira.
- Software Testing Engineer, nasr soft(Full-time → Part-time, Remote)** 07/2025 – Present
- Conducted manual testing across core web features to ensure consistent user behavior, performed performance testing using JMeter and API testing with Postman and Swagger, and built Cypress-based regression suites with defect tracking in Jira.
- Software Testing Engineer, Medicaspace(Remote)** 04/2026 – 07/2026
- Verified web application functionality through structured manual test cycles within an Agile environment, validated API endpoints using Postman and Hoppscotch for data accuracy, and documented defects and testing activities in ClickUp.
- Software Testing trainee, Waretech** 05/2025 – 08/2025
- Practiced manual testing techniques, including test case design and execution, gained hands-on experience in API testing with Postman, and learned defect reporting and tracking using Jira.

Education

Bachelor's Degree in Computer Science, 07/2020 – 09/2024
Al-Obour Higher Institute for Computer Science and Information Systems

Skills

Testing

Manual Testing, Automation Testing, API, Regression Testing, UI Testing, Performance testing

Automation

Selenium WebDriver, TestNG, Maven, cypress

Methodologies

Agile/Scrum

Programming

Java, Object-Oriented Programming(oop)

Tools

Postman, JIRA, GitHub, jmeter, intellij, clickup

Projects

gosharry , (SaaS E-commerce Builder)

- Tested core storefront and admin workflows across multiple user roles, executed API testing using Postman, and built Selenium regression scripts with defects tracked in Jira.

card4games , (Voucher E-commerce Platform)

- Performed end-to-end testing for purchase, wallet, and catalog flows, conducted performance testing with JMeter, and maintained a Cypress automation suite for critical regression scenarios.

Nexus , (Voucher E-commerce Platform)

- Verified catalog and checkout workflows through structured manual cycles and validated API responses using Postman and Swagger, documenting defects to closure in Jira.

medicaspac , (Healthcare Social Networking & Community Platform)

- Validated key user journeys across networking and content features, created clear test cases, and performed API testing with Swagger while tracking issues in ClickUp.

justacodes, (Multi-tenant Reseller)

- Tested multi-tenant wallet, order, and affiliate/referral logic, logging and verifying defects in Jira and running regression checks with Postman and Cypress.

Courses

Practical Software Testing Diploma , AIM Tech	06/2026
ISTQB® CTFL V4.0 , ITIDA	05/2026
ISTQB Foundation Level V4.0 , maharatech	03/2026
Master Performance Testing Using Jmeter , Udemy	02/2026
Cypress , QAcart	11/2025
Performance Testing Certification , QAcart	08/2025
Postman Automation project , QAcart	05/2024
